Quæ de ORBE VETERIBUS NOTO *Mappæ Geographicæ hactenus prodierunt, non* EUROPAM *modò universam, sed et* ASIAM *totam et* AFRICAM *exhibent, quà patent Recentioribus. In regionibus etiam designandis, circa fines Asiaticos præsertim, et insulas his finibus adjacentes, multum ultra veros* ANTIQUI ORBIS *limites progressum est.*

Quod si Mappa hæc nostra hodiernum amplecteretur trium Orbis partium amplitudinem, intra spatium multo angustius coarctata veteris Geographiæ Continens, se nimis exilem, et in propriis rebus egenam ostenderet, quàm tamen de eâ præcipuè opus fuerit institutum.

Quantum verò discrimen sit inter Geographiam veterem et novam facile erit æstimari, si Mappa quæ oculis subjicitur, cum aliis Orbis partium tabulis conferatur.

Quibus autem fulciatur argumentis nostra de ANTIQUI ORBIS *limitibus sententia, docebunt variæ eâ de re disquisitiones, quæ regiæ Humaniorum Litterarum Academiæ Commentariis commissæ, sub prelo sudabunt, in lucem prodituræ.*
